

Tie Dyed Milk

What happens to the food coloring when you first put it on the milk? Why do you think that is?

red food colouring turns to orange
green turns dark, red-orange blue-black
blue dark red-red

What happens when you add the drop of soap?

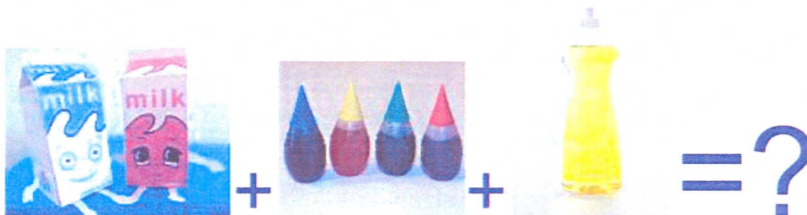

it keeps moving! It looks like it's alive!

Does the movement go on forever? What happens?

it goes for about 10 minutes

Did you get a different result using a different type of milk? What happened?

blue goes like fireworks!

Fat

After

We discussed why the students had drawn these types of reactions "What is happening here?"
